# Cedarworks Apps at a glance

## Problem Statement

Pastors and salespeople lose hours to repetitive prep and unpracticed skills. Generic AI doesn't fit their work.

## Traction & Metrics

Both apps live on iOS, Android and web; ~30 trial users; \$0 MRR (pre-revenue); team of 1.

## Business Model

Monthly subscriptions, ~68–77% estimated gross margin, target LTV:CAC of 3:1 or better.

## Team

Founder James Chambers: computer science degree, 40+ years in sales, built both apps.

## Solution & Product

Focused AI apps: PastorAI (\$47/mo) for ministry and Ready Room (\$29/mo) for sales-call practice.

## Market Opportunity

~\$690M U.S. TAM across 300K+ churches and ~1.5M B2B sales reps; 8 more apps widen it.

## Competitive Landscape

Direct: ministry software, sales role-play platforms. Indirect: ChatGPT. We win on focus and price.

## The Ask

\$250K pre-seed for about 18 months: grow the two apps and launch 8 more with AppForge.

# Generic AI doesn't fit how pastors and reps work

## Pastors are overloaded

Sermons, studies, devotionals, kids' lessons, social posts and translation fill the week, often with little or no staff. 42% of U.S. pastors considered quitting full-time ministry in the past year (Barna Group, 2022).

## Sales reps practice on real prospects

Discovery and objection-handling are learned live, on the calls that matter. One fumbled objection can cost a deal worth thousands in commission.

## General chatbots don't close the gap

Existing options fall short: chatbots don't know the workflow or vocabulary, and sales-training platforms are priced and sold for enterprise teams.

**Why we know this problem:** Founder James Chambers watched the weekly workload his bishop carried, and spent 40+ years in sales watching reps learn objection-handling on live deals.

# Focused AI apps that each do one job really well

Cedarworks Apps builds niche, subscription AI apps: one profession, one clear job, a running start in seconds. Each app has its own workflow, prompts and guardrails, so users get results instead of a blank chat box.

*One studio, many apps. Shared code, shared infrastructure, one founder-led team.*

## **Built for one job**

Purpose-built workflows, not generic chat

## **Everywhere users are**

iOS, Android and web

## **Recurring revenue**

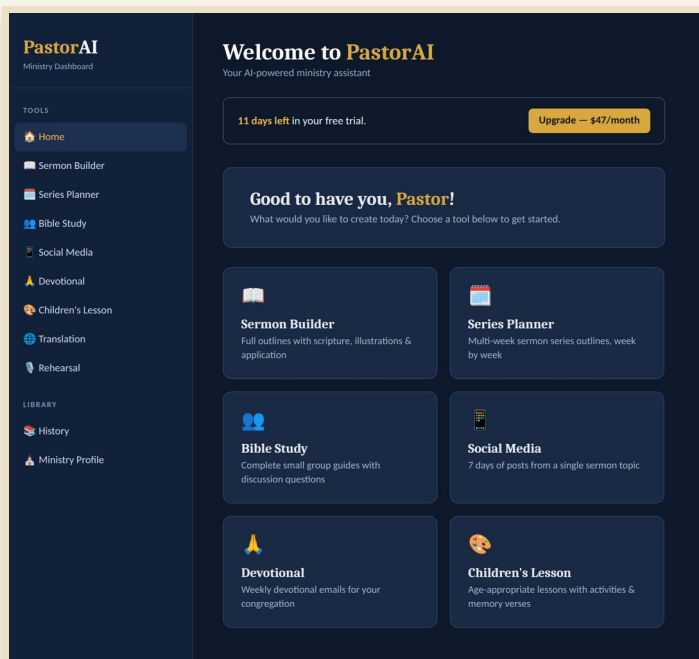

Monthly subscriptions with free trials

## **A portfolio, not a bet**

Many apps spread the risk and share costs

# PastorAI: an AI ministry assistant for the whole week

## 90-day KPI targets

|                           |          |
|---------------------------|----------|
| Paying subscribers        | 75       |
| Monthly recurring revenue | ~\$2,850 |
| Trial-to-paid conversion  | 20%+     |
| Monthly churn             | under 6% |
| CAC tracked per channel   | weekly   |

## Market Opportunity

# A ~\$690M U.S. market for our first two apps

### TAM: total addressable

300K+ U.S. congregations × \$564/yr ( $\approx$  \$169M), plus ~1.5M U.S. B2B sales reps × \$348/yr ( $\approx$  \$522M).

### SAM: serviceable

The ~30% we can reach with digital, self-serve sales: small and mid-size churches, and individual reps and small teams.

### SOM: 3-year target

1% of SAM, or about 4,500 subscribers and ~\$2M in annual recurring revenue.

### Expansion

Each of the 8 AppForge apps adds a new market on top of these two.

# Why the timing is right

## AI got affordable

The cost of running language and voice AI has fallen sharply since 2023, so \$29–\$47/month apps can earn healthy margins.

## People expect AI help

Most professionals have now tried AI chat, and found it doesn't fit their daily work. That gap is where focused apps win.

## Small studios can ship fast

App stores give global distribution and billing on day one, and AppForge lets one team launch app after app.

**Customer segments:** (1) pastors and staff at small and mid-size churches; (2) individual B2B sales reps and small sales teams; (3) sales managers and church networks buying group plans; (4) new niches chosen by AppForge.

# Recurring subscriptions with healthy unit economics

| Unit economics (per subscriber)  | PastorAI  | Ready Room |
|----------------------------------|-----------|------------|
| Monthly price                    | \$47      | \$29       |
| Net after app-store fee (15%)    | \$39.95   | \$24.65    |
| Est. AI + hosting cost / user    | ~\$4      | ~\$5       |
| Gross margin                     | ~77%      | ~68%       |
| Lifetime value (5% churn, 20 mo) | ~\$720    | ~\$390     |
| Target CAC (LTV:CAC ≥ 3:1)       | ≤ \$240   | ≤ \$130    |
| CAC payback                      | ~7 months | ~7 months  |

**Our advantages:** focus on niches big platforms ignore • self-serve pricing individuals can afford • AppForge speed to new markets • a shared platform that lowers each app's cost • a founder with both the technical and sales background.

## Use of Funds

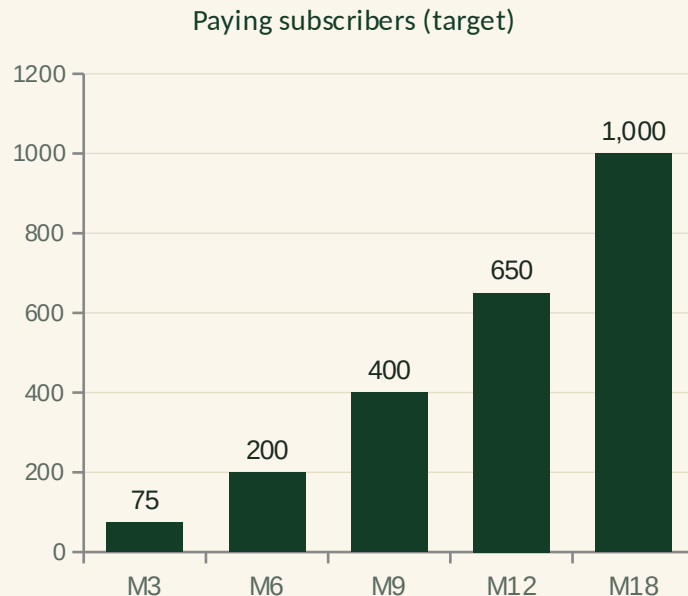

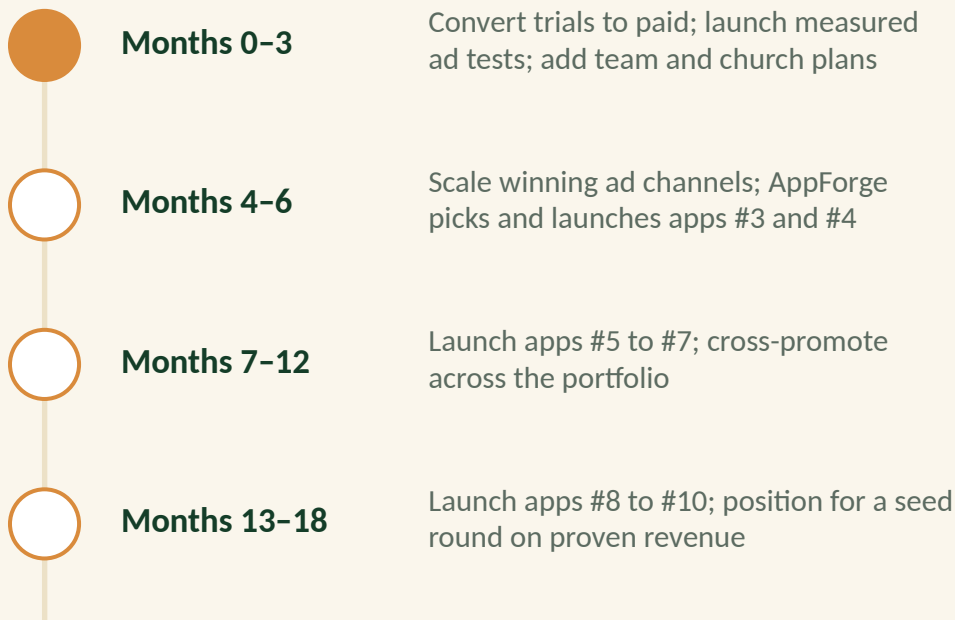

# \$250K to scale two apps and launch eight more

- **\$100K** Customer acquisition: PastorAI & Ready Room ads
- **\$75K** Build 8 new apps with AppForge
- **\$25K** AI compute, hosting & infrastructure
- **\$25K** Legal, accounting & app-store operations
- **\$25K** Founder runway & reserve

*About 18 months of runway on a lean, founder-led cost base.*

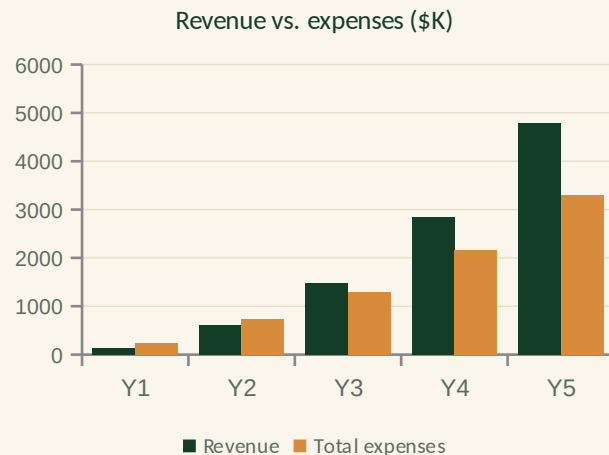

# From 2 apps to 10: milestones this round unlocks

*Targets, not forecasts: 1,000 subscribers at a ~\$38 blended price ≈ \$38K MRR (~\$450K ARR).*

# Profitable in year 3, ~\$4.8M revenue by year 5
