CEDARWORKS APPS

Practical AI apps, built to do real work.

Pre-seed round

$450K

Springfield, MO

An AI app studio with two apps live in the app stores today, and AppForge, our in-house app factory, to build the next eight.

James Chambers, Founder · james@cedarworksapps.com · 417-370-2084 · cedarworksapps.com

Executive Summary

Cedarworks Apps in one minute

What we do

We build focused AI apps for specific professions and sell them as subscriptions.

Live today

PastorAI ($47/mo) for pastors and Ready Room ($29/mo) for sales reps, on iOS, Android and web.

Focus first

The next 6 months prove these two apps. New apps unlock only after we hit 150 paying subscribers.

The ask

$450,000 pre-seed: founder full-time, cold email and marketing, then AppForge apps 3–10.

Generic AI doesn't fit how pastors and reps work

Pastors are overloaded

Sermons, Bible studies, devotionals, kids' lessons and social posts fill every week, often with little or no staff. Most of it starts from a blank page, and it leaves little time for people.

Sales reps practice on real prospects

Reps learn to handle objections on live calls. One fumbled objection can cost a deal worth thousands in commission, and practice tools are mostly built for big companies.

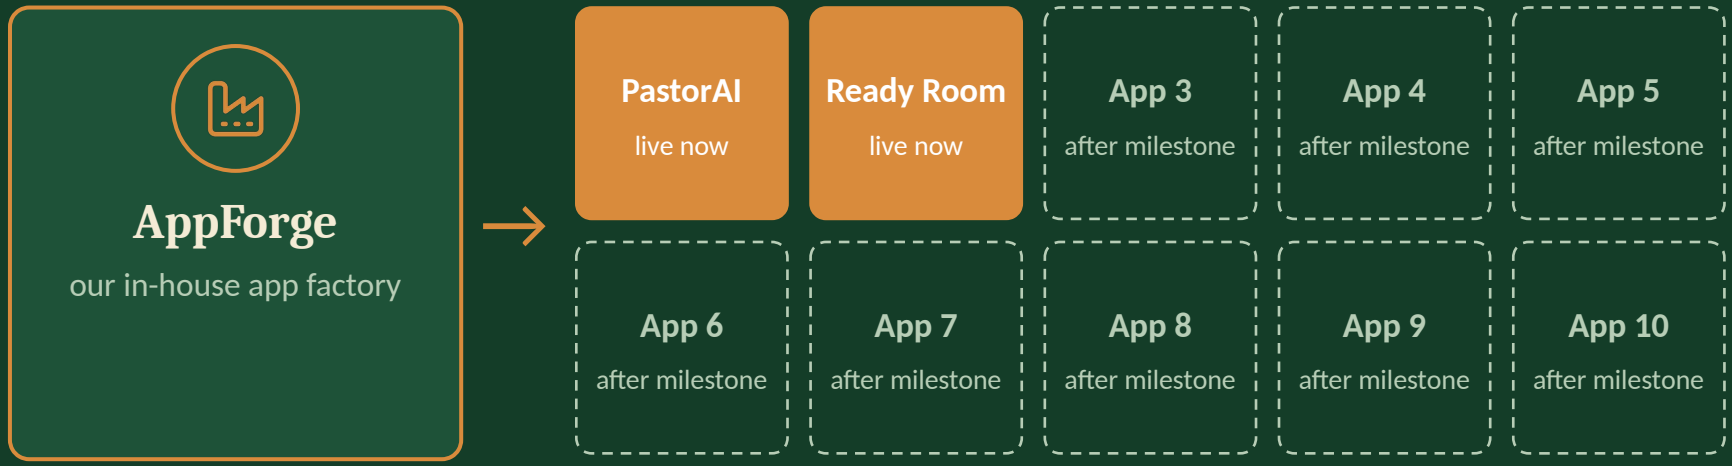

General chatbots don't close the gap

Tools like ChatGPT don't know these jobs. People spend more time writing prompts than getting their work done.

Why we know: founder James Chambers watched his bishop's weekly workload, and spent 40+ years in sales.

One platform, focused AI apps

Each app does one job for one profession, with no prompting needed. Every app runs on the same code, AI stack and operating system, and is sold the same way: a self-serve subscription with a free trial.

Apps 3–10 unlock only after PastorAI and Ready Room reach 150 paying subscribers.

PastorAI: an AI ministry assistant for the whole week

What a pastor can create

Sermon Builder: full outlines with scripture and application
Series Planner: multi-week sermon series
Bible Study: small-group guides with questions
Social Media: 7 days of posts from one sermon
Devotionals and children's lessons
Translation into 10 languages
Rehearsal: practice delivering the sermon

"This will save me so much time. It's a great tool." — Pastor Dennis, trial user

$47/mo
after a 14-day free trial

~15
trial users so far

3 platforms
iOS, Android and web

Ready Room: a flight simulator for sales calls

$29/mo
or $249/year

~15
trial users so far

3 platforms
iOS, Android and web

How reps practice

Talk out loud to a voice AI prospect that reacts to how you sell
Two drills: discovery questions and handling objections
Three levels: easy, medium and hard
18+ prospects across industries, from roofing to software
Score real calls: record live, upload a recording or paste a transcript
AI coach grades every session and says what to fix next

Built on the founder's 40+ years in sales.

AppForge: our in-house app factory

One system that takes us from market research to a finished, marketed app. It's internal only: our competitive edge, not a product we sell.

1 Know

Learns the business, audience and goals

Brain · Chief of Staff

2 Find

Finds proven app ideas with real demand

Top 100 Apps · App Types · Opportunities · Market Analysis · Viability Scorer

3 Build

Plans the app and writes the code

Projects · Tech Stack · Build · Store Listing

4 Market

Builds a marketing funnel for each app

Attractive Character · Framework Extractor · One-to-Many Emails, Social, Ads & Presentations

Traction & Metrics

Built, shipped and live, before raising a dollar

2
AI apps live in the app stores

3
platforms: iOS, Android, web

~30
trial users across both apps

$0 MRR
pre-revenue · team of 1

What's already proven

- Two complete AI apps (one with voice AI) shipped solo
- Live on App Store, Google Play and web
- Subscriptions and free trials working
- AppForge built and ready for apps 3–10
- First testimonial from a trial user

What we'll prove next (90 days)

Paying subscribers	**75**
Monthly revenue (MRR)	**~$2,850**
Trials that convert to paid	**20%+**
Subscribers who cancel each month	**under 6%**

Prove two apps first, then scale with AppForge

Phase 1 · Months 0–6

Prove PastorAI and Ready Room

- Cold email and marketing to win paying customers
- Learn which channels win customers most cheaply
- Add church-staff and sales-team plans

Gate

150 paying users

Phase 2 · Months 7–18

Launch apps 3–10 with AppForge

- About one new app every 6 weeks
- Each uses the proven sales playbook from Phase 1
- Cross-promote apps to each other's users

Why this is one company, not two: every app shares one platform, one AppForge pipeline and one sales playbook: self-serve subscriptions for busy professionals.

Market Opportunity

Two large markets, each with room to grow

PastorAI: churches

~$169M

U.S. market at today's prices: 300,000+ U.S. congregations × $564/yr

Today: individual pastors

Next: church-staff plans

Then: denominations and church networks buying for hundreds of churches

Ready Room: sales teams

~$522M

U.S. market at today's prices: ~1.5M U.S. B2B sales reps × $348/yr

Today: individual reps

Next: sales-team plans

Then: company-wide sales training and enablement

Targets: reachable market ~$207M (the ~30% we can reach online); 3-year goal ~$2M a year in revenue. Organization plans and apps 3–10 are upside on top.

Sources: Hartford Institute for Religion Research and U.S. Religion Census (congregations); U.S. Bureau of Labor Statistics (wholesale and manufacturing sales reps).

PastorAI: the all-in-one weekly assistant for pastors

Competitor	What they focus on	Where PastorAI wins
ChatGPT and general AI (indirect)	General-purpose chat	**Built for ministry, no prompting, writes in the pastor's voice**
Logos (Faithlife)	Bible study and research library	**Creates the week's finished content, not just research**
Pulpit AI	Turns a recorded sermon into clips and posts	**Helps before the sermon too: outlines, series, studies, kids' lessons**
Gloo	Church engagement and growth platform	**Simple self-serve tool a single pastor can start today**

Our edge: one dashboard for the whole ministry week (sermons, series, studies, devotionals, kids' lessons, social posts, translation, rehearsal) at $47/month.

Ready Room: sales practice any rep can afford

Competitor	What they focus on	Where Ready Room wins
Second Nature	AI role-play training for company sales teams	**Self-serve at $29/month; no company contract needed**
Hyperbound	AI cold-call role-play for sales teams	**Covers discovery and objections across 18+ industries**
Gong	Analyzes recorded sales calls for large teams	**Practice before the call, plus scoring of real calls**
Practicing with a manager or peer	Role-play when someone has time	**Available any time, at three difficulty levels**

Our edge: the well-funded players sell to big companies. Ready Room serves the individual reps and small teams they skip, then grows into team plans.

Subscriptions today, organization plans next

App subscriptions

Monthly or annual plans with a free trial, sold through the app stores and the web.

Team plans

Per-seat plans for church staffs and sales teams: one buyer, several users.

Organization plans

Denominations, church networks and companies buying for many churches or reps at once.

Pricing today: PastorAI $47/month after a 14-day free trial · Ready Room $29/month or $249/year.
Unit economics (planned): ~68–77% gross margin; each subscriber worth ~3× what it costs to win, paid back in ~7 months.

Go-to-Market Strategy

How we'll turn trials into paying customers

PastorAI

- Cold email to pastors and church leaders, starting now
- Facebook, YouTube and LinkedIn aimed at pastors and church staff
- Partnerships with denominations, church networks and seminaries
- Conferences, webinars and free sermon-prep resources

Ready Room

- Cold email to sales reps and sales managers, starting now
- LinkedIn and short videos showing live AI role-plays
- Partnerships with sales trainers, coaches and bootcamps
- Team plans, app store search and referral rewards

Cold email first, to win paying customers fast: AppForge writes the campaigns, plus social posts, ads and presentations.

Team & Founders

A founder who can both build and sell

James Chambers

Founder & CEO · Springfield, MO

Technical: degree in computer science

Builder: designed and shipped PastorAI and Ready Room (with voice AI) on iOS, Android and web, solo

Systems: built AppForge and Business HQ to run many apps

Seller: 40+ years in sales across many industries

Why him: lived both problems: his bishop's workload, and decades of selling

Hiring with this round

Contract developer

Builds apps 3–10 with AppForge (Phase 2)

Part-time growth marketer

Runs cold email, ads and partnerships

Advisors (recruiting now)

Ministry, sales training and software

Financial Projections · 3-year model

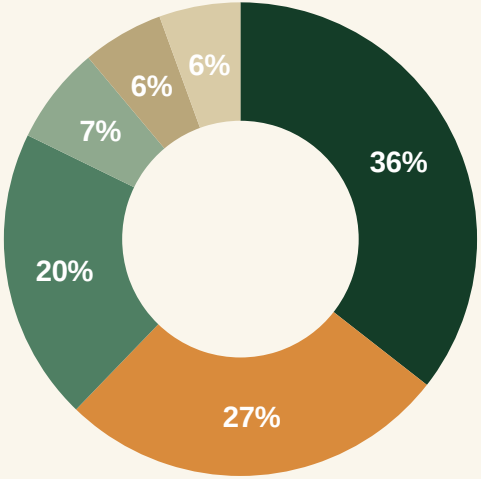

Break-even in year 3, ~$2M annual revenue run-rate

	Year 1	Year 2	Year 3
Paying subscribers (end of year)	650	2,000	4,500
Annual revenue run-rate at year end (ARR)	$296K	$912K	$2.05M
Revenue during the year	$128K	$604K	$1.48M
Gross margin (after app-store fees, AI, hosting)	~73%	~73%	~73%
Operating costs (marketing, salaries, other)	$340K	$600K	$900K
Profit (loss)	**−$247K**	**−$159K**	**$182K**
Average monthly burn	~$21K	~$13K	none

Runway: the $450K covers about 18 months, with roughly $120K left at month 18 when we raise a seed round to scale apps 3–10.
Assumptions: ~$38 average monthly price, ~5% monthly cancellations, new apps only after the Phase 1 milestone. Projections, not guarantees.

Use of Funds · Milestones each dollar buys

$450K over 18 months, released in two phases

- **$160K** — Marketing: cold email, ads and outreach
- **$120K** — Founder salary: 18 months full-time
- **$90K** — Apps 3–10 with AppForge (Phase 2 only)
- **$30K** — AI, hosting and infrastructure
- **$25K** — Legal, accounting and operations
- **$25K** — Reserve

Milestones

Month 3: 75 paying subscribers

Month 6: 150 paying (unlocks Phase 2)

Month 12: 650 paying; apps 3–6 live

Month 18: ~1,000 paying; 10 apps; seed round

The $90K for new apps is spent only after the Phase 1 milestone. 1,000 subscribers at ~$38 ≈ $38K a month in revenue.

The Ask

Raising $450,000 to prove our apps, then scale to 10

- Founder full-time for 18 months
- Cold email and marketing to win paying users fast
- 150 paying subscribers unlocks apps 3–10 with AppForge
- ~1,000 paying subscribers by month 18, then a seed round

Use of funds: $160K marketing · $120K founder salary · $90K apps 3–10 (after the milestone) · $80K AI, operations and reserve

Pre-seed · terms open to discussion (SAFE or priced round)

Appendix

Product screens, AppForge in detail, unit economics and key terms

One dashboard for the whole ministry week

1 Pick a tool

Eight ministry tools, one click away in the sidebar.

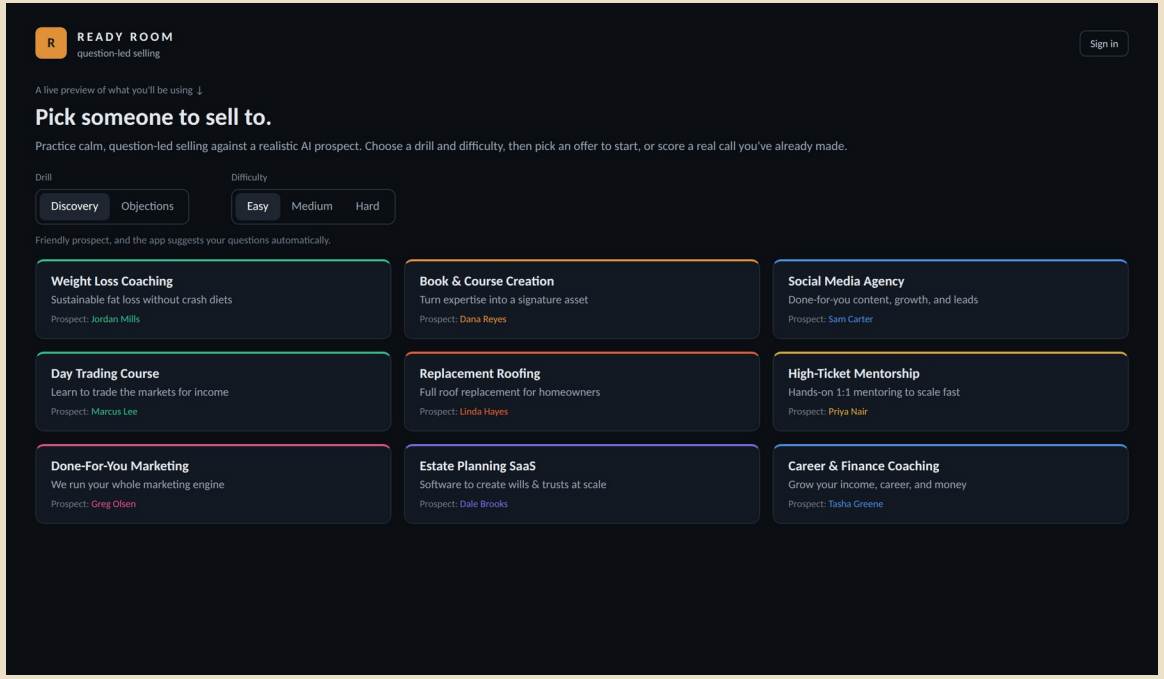

2 Create in minutes

For example, a full sermon outline with scripture, illustrations and application.

3 Try free, then subscribe

A 14-day free trial, with the $47/month upgrade built into the app.

Pick a prospect, pick a drill, start selling

1 Choose a drill

Discovery or objections.

2 Set the difficulty

Easy, medium or hard.

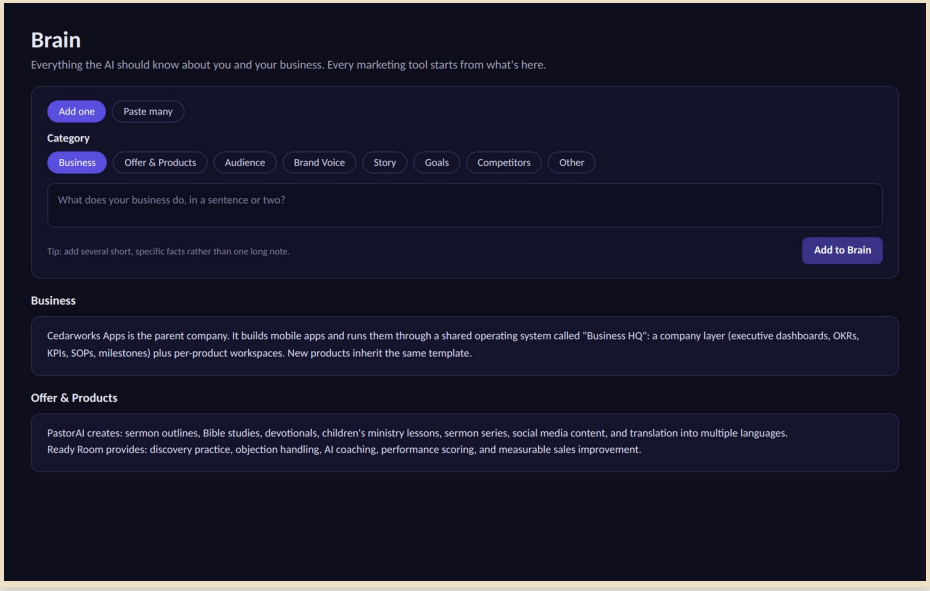

3 Pick a prospect

18+ industries, each with a realistic AI buyer.

4 Get scored

An AI coach grades every call, including real calls you upload.

Brain and Chief of Staff: AppForge learns the business

AppForge's Brain screen

Brain

Stores what the AI should know about the owner and business, in 7 areas: business, offers and products, audience, brand voice, story, goals and competitors. It's used to pick apps that fit the owner and to write marketing in their voice.

Chief of Staff

An AI business partner grounded in the Brain. Ask it a question, such as “I want to develop an app for…”, and it researches the answer and helps decide what to do next.

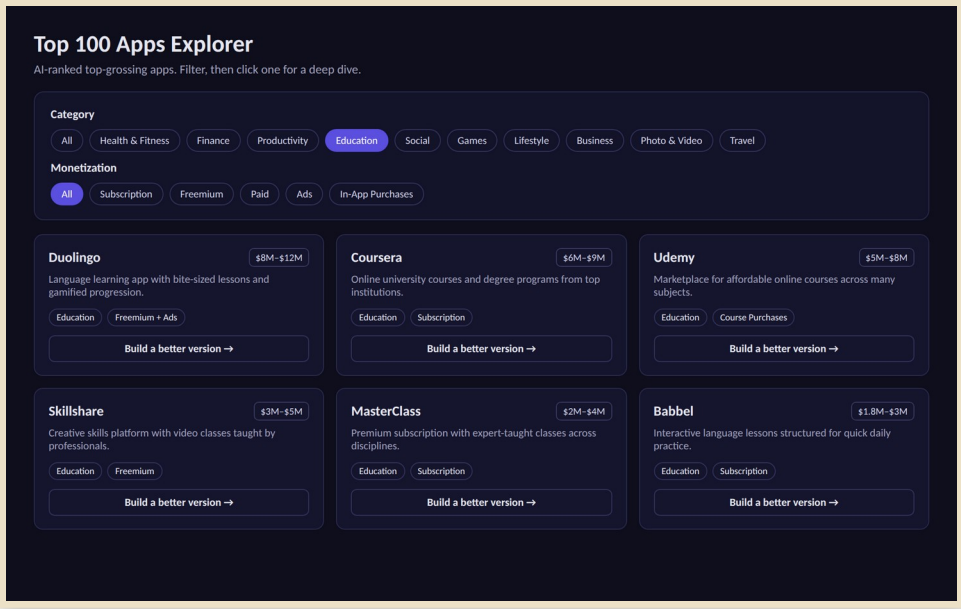

Start from apps people already pay for

Top 100 Apps Explorer: ranks the top-grossing apps by category and how they make money (subscription, freemium, ads).

Build a better version: one click starts a new app from a proven idea, focused on a niche the big apps underserve.

App Types & Opportunities: suggest specific, scored app ideas.

Market Analysis & Viability Scorer: check demand, competition and fit before we build.

Top 100 Apps Explorer. Revenue ranges are AppForge's AI estimates.

AppForge plans the app and writes the code

Projects

Each app gets its own workspace, plan and milestones.

Tech Stack

Picks the technology, reusing our proven AI, voice and billing setup.

Build

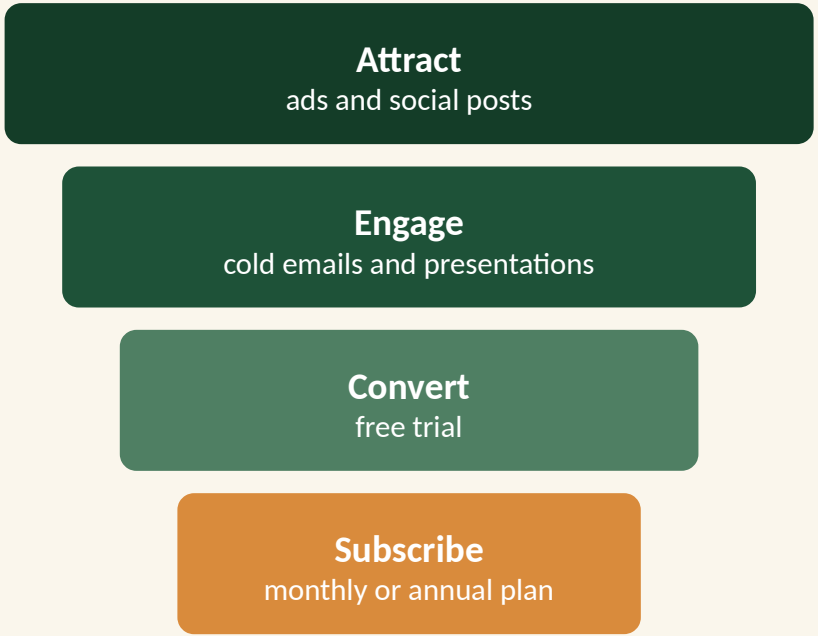

Generates the working app code.

Store Listing

Writes the App Store and Google Play listing.

Business HQ: every new app plugs into our shared operating system (dashboards, goals, key metrics, procedures and milestones), so one small team can run ten apps.

A ready-made marketing funnel for every app

Attractive Character: the brand persona and founder story behind the marketing

Framework Extractor: turns the owner's know-how into frameworks the content is built on

One-to-Many Emails: cold-email campaigns that bring in trial users

One-to-Many Social & Ads: social posts and ad copy

One-to-Many Presentations: presentations that sell to many people at once

All of it is written from the Brain, in the owner's voice.

Why AppForge matters to investors

Less guesswork

Every new app starts from proven demand and a viability score.

Faster launches

AppForge writes the code, so a new app takes far less time to build.

Lower cost per app

Shared code, AI stack and Business HQ keep each app's cost low.

Marketing from day one

Every app launches with its funnel, emails and ads ready.

PastorAI and Ready Room were built before AppForge, and the lessons from building them went into it. Apps 3–10 will be the first built with AppForge.

Why the timing is right

AI got affordable

The cost of running language and voice AI has fallen sharply since 2023, so $29–$47/month apps can earn healthy margins.

People expect AI help

Most professionals have tried AI chat and found it doesn't fit their daily work. Focused apps fill that gap.

Small teams can ship fast

App stores handle distribution and billing, and AppForge lets one team launch app after app.

Who we sell to: pastors and staff at small and mid-size churches; individual sales reps and small sales teams; sales managers and church networks buying group plans; and new niches chosen by AppForge.

Each subscriber is worth ~3× what it costs to win

Per subscriber	PastorAI	Ready Room
Monthly price	**$47**	**$29**
What we keep after the 15% app-store fee	**$39.95**	**$24.65**
Estimated AI and hosting cost per user	**~$4**	**~$5**
Gross margin (share of revenue left after those costs)	**~77%**	**~68%**
Lifetime value: profit over an average ~20-month subscription	**~$720**	**~$390**
Most we'll spend to win one customer (CAC)	**$240**	**$130**
Months to earn that cost back	**~7**	**~7**

Rows after the price are planning assumptions (5% of subscribers cancel each month), not results yet.

Appendix

Key terms used in this deck

TAM / SAM / SOM

Total market / the part we can reach / our target share

MRR / ARR

Monthly / annual recurring revenue from subscriptions

Churn

Share of subscribers who cancel each month

Trial-to-paid conversion

Share of free-trial users who become paying subscribers

Gross margin

Share of revenue left after app-store fees, AI and hosting

LTV (lifetime value)

Profit from one subscriber over their whole subscription

CAC

Customer acquisition cost: spend to win one subscriber

Pre-seed / SAFE

First outside funding round / an agreement that turns into shares later
